

Systems Tools and Resources 2.0

The STAR 2.0 CD-ROM is a sales tool designed to provide commercial building architects and engineers, commercial security dealers, sales professionals, security surveillance and loss prevention managers with all the necessary information required for specifying Honeywell intrusion,

video and access control products. It also serves as an excellent training and support tool, and can be used to increase the product knowledge of sales, installation and technical support professionals.

FEATURES

- **Complete Product Guide**

This resource provides extensive and detailed information on Honeywell intrusion, fire, access and video product information that ranges from product features to CAD drawings in all-in-one portable convenience of CD-ROM.

- **System Design Tool and Calculator**

These design tools help you make the correct equipment choices, obtain parts lists and specifications.

- **Spec Writer (Parts List)**

Instantly creates a custom specification and parts list based upon system requirements

- **Power Calculator**

Helps determine the power requirements and recommended back up battery size for leading Honeywell commercial control panels and peripherals

- **Select Access**

Creates a parts list based upon user requirements and door structure

- **Camera and Lens Selector**

Helps identify the right equipment based upon the application requirements

- **KD5/KDF Configuration Tool**

Helps you choose the proper lens, resolution and mounting options

- **Modular Camera Configuration Tool**

Helps build custom cameras from Honeywell's MagnaView and PrimaView lines

- **System Overview**

This interactive system provides detailed product specification, submittals, literature and other important information on various Honeywell commercial security products.

- **Vertical Solution**

Provides information on meeting the system requirements of various commercial security vertical markets, including corporate offices, retail establishments, warehouses, financial institutions, medical facilities and more.

- **Start Presenting**

Start Presenting is a tool that provides everything you need to design powerful MS PowerPoint presentations. It includes a presentation template and a complete active Legend page featuring interactive product icons that can be copied and pasted or dragged and dropped into custom presentations. The icons also provide product narrations and links to online information, which can be accessed with a single click of the mouse during presentations.

- **Engineering Support Software**

Includes Auto CAD drawings (online drawings of equipment used for system design), A&E specifications, agency listing cards (UL, ULC, CSFM, FM and MEA) and more.

- **Marketing Assistance Software Product Literature**

Complete product data sheets and sell sheets

- **Literature XPress**

Online service, available exclusively for Honeywell Security dealers, lets you instantly personalize polished and professionally designed marketing materials for your company

- **Online Training**

Web training on latest Honeywell security products

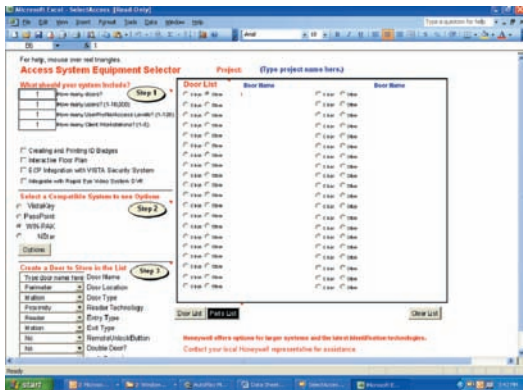

- **Graphics Library**

A library of major product images

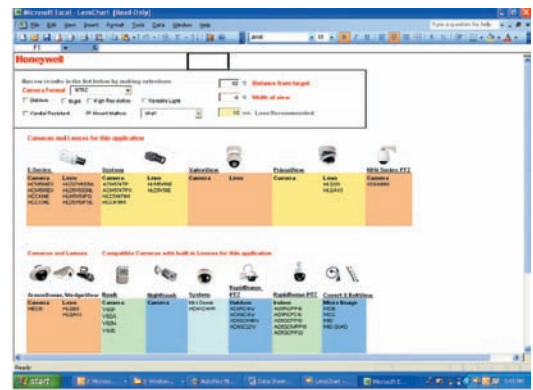

- **Videos**
