

# Honeywell Video and Access Training – 2011

## **Video and Access Training**

The Honeywell training programme provides installers, systems integrators and end-users with the knowledge and tools necessary to optimally deploy and operate Honeywell Security Group products. Our trainers have many years of experience not only as instructors, but also directly in the field. Course sizes are limited to approximately 8 people to ensure a quality hands-on learning experience.

## **Course Offering**

The courses listed overleaf are scheduled for 2011 at our Runcorn and Burgess Hill training centres. The training courses range from Foundations in CCTV and Access Control to IP and Video Analytics. They are offered free of charge and are of 1 or 2 day duration.

## **On Demand Training**

We offer "on demand" courses which are not included in the official schedule but are available subject to minimum registrations. These are listed overleaf. We make every effort to deliver project based training following completion of a large installation. This is available subject to Honeywell engineer availability. Please enquire herein should this be required.

## **How to Register**

To register for a scheduled class please visit our website [www.honeywell.com/security/uk/systems](http://www.honeywell.com/security/uk/systems) and complete the online booking form. Alternatively, please call us on 08448 000 235 or email [HSGRuncornTraining@honeywell.com](mailto:HSGRuncornTraining@honeywell.com).

# Course Overview and Schedule

## Foundation in CCTV

Honeywell's popular foundation CCTV course is ideal for anyone at work in the industry needing to update their skills. This course offers a balance of classroom theory and hands-on practical tuition.

## MAXPRO® VMS

This is a two day in depth course on Honeywell's premier video management system.

## Fusion IP

Utilising Honeywell's Fusion IV DVR you will develop all the skills necessary to install, commission and maintain a Hybrid IP system. It is a prerequisite of this course that you have some IP CCTV experience.

## MAXPRO® / VideoBlox

This is a two day in depth course on

Honeywell's premier video management system with VideoBlox.

## Access Control Hardware

This comprehensive course will provide an insight into the different Honeywell access control panels. For correct selection and application this is an ideal course as a prelude to the Win-PAK training modules.

## WIN-PAK® SE (Burgess Hill) & WIN-PAK® SE Basic (Runcorn)

WIN-PAK SE is the Introduction to Honeywell's most popular systems integration access control solution. The course covers WIN-PAK SE, N1000 Hardware and Fusion integration.

## WIN-PAK® PE (Integration)

WIN-PAK PE builds on WIN-PAK SE training (which is a prerequisite for

attendance on this course), candidates will enhance their previous learning experience with PE Features including PRO2200 hardware and Galaxy integration.

## FVMS

The HFVMS Management Software is a powerful, Multi-site management software that allows you to utilise your Fusion and HRDP recorders to their fullest capabilities.

### On Demand Courses

- Foundation in Access
- Understanding resolution in analogue and IP CCTV systems
- IP CCTV
- Video Analytics
- Performance Range
- RapidEye
