

Rapid Eye™ Multi-Media DSP v8 Real-Time Digital Video Recorder (DVR) System

You need crisp live video images. You've been searching for an easier way to set up the recording components of your surveillance system. You've been wishing for a simpler means to search video, audio and data transactions. And you need a system that saves all that data in one place so you can access it easily. The wait is over. Honeywell's Rapid Eye Multi-Media DSP v8 gives you all that—and more.

Now you can easily configure and manage the vast functionality of Rapid Eye Multi-Media DSP v8 using the enhanced, mouse-driven interface. Actions such as instant PTZ setup and creation of evidence clips are easier than ever with intuitive wizard-based configuration tools that walk you through each step. In addition, v8 comes equipped with a DVD writer that lets you export longer video clips than you could store on a CDRW—up to seven times more data!

Product Features:

- Event-driven response recording triggered by schedules, motion detection, video loss, alarm input activation and/or data capture rules
- Ability to store clips on DVD, CD or USB memory storage
- Honeywell's proprietary IntelliBus™ technology upgrades camera firmware over a telemetry line, and uploads/downloads camera configurations
- Multiple language support is fully integrated now with the LocalView, as well as with ADMIN and VIEW software. The language is dynamically set to the preference of the user that is logged in.

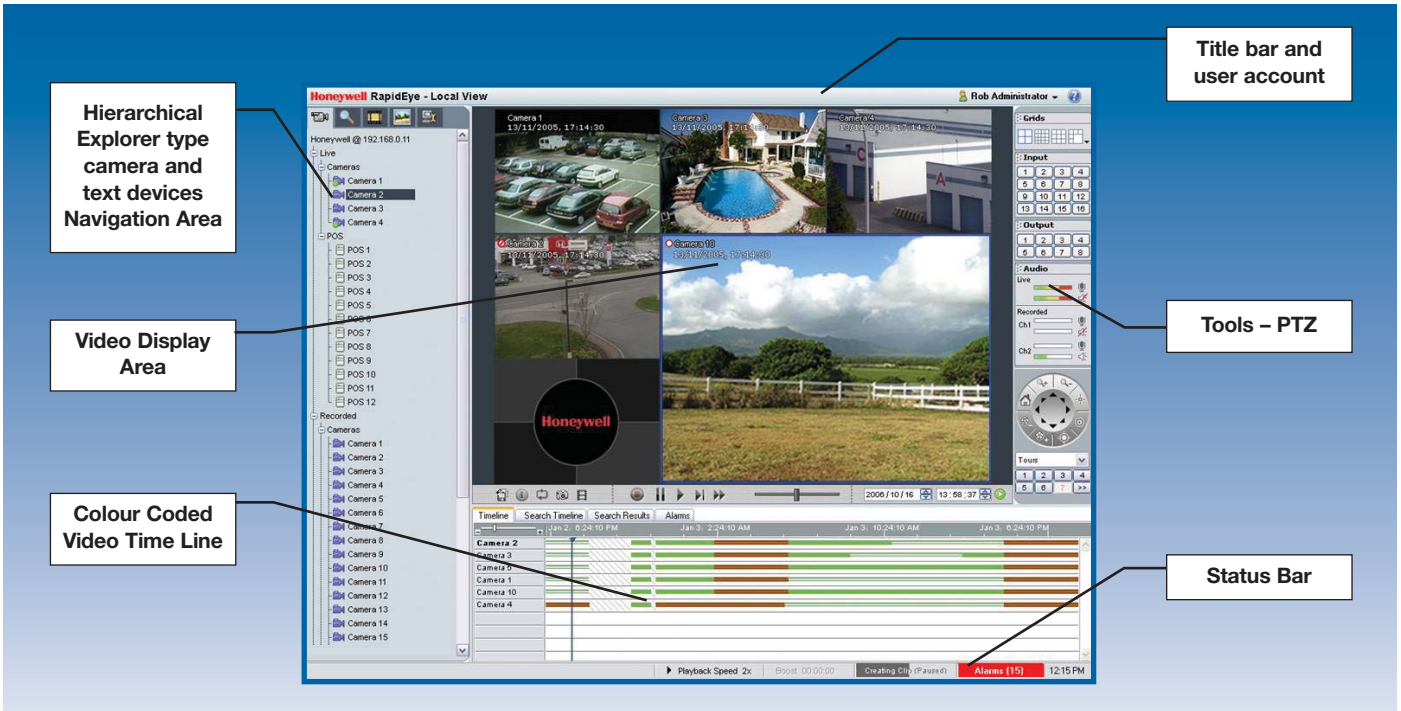

CUSTOMER BENEFITS

- Enhanced, mouse driven, LocalView interface. Use VGA monitor and mouse to make changes to the default DVR configuration.
- Graphical time line representation shows the user the availability and type of video recorded.
- Wizard based configuration – RapidConfig™ – allows quick and easy setup.

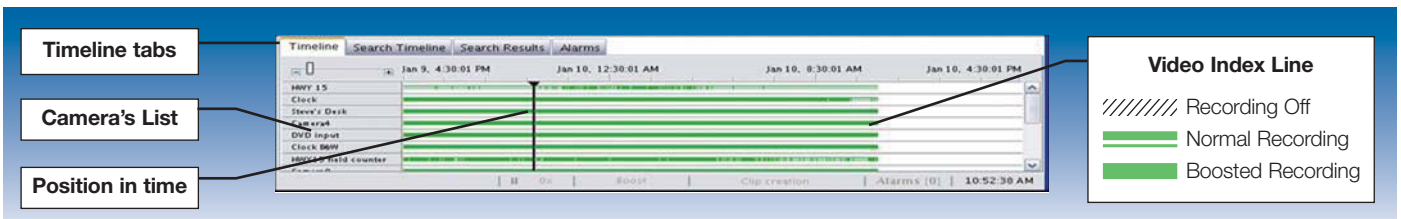

Rapid Eye™ Multi-Media DSP v8

Real-Time Digital Video Recorder (DVR) System

Rapid Eye Multi-Media DSP v8 introduces a powerful and completely remodeled LocalView user interface that allows installers and end users to configure and operate the DVR locally. The LocalView software bridges the gap between popular Windows®-based DVRs and Rapid Eye. Availability of this comprehensive software tool removes the perceived advantage of the Windows-based recorders and expands market appeal where graphical representation of the configuration and functionality was a “must have.”
